

## life and love and why: a caveat

Everything, literally everything, we do in this life is a matter of love or sin. Love and sin are antithetical to one another and because this is the case, when we are passive in love, we are actively sinning.

Scary. life and love and why is an exploration of our call to love God with the entirety of who we are. It is a great and profound calling but unfortunately one that not many people, very much including Christians, have taken seriously. This quite possibly because not many have really understood the calling. Its about time we did. This book is meant for that discussion. It is an exploration that when undertaken will hopefully lead to understanding what it means to love God with all our heart and to love our neighbor as ourselves but also to understand what is left for us when we choose not to. In that way, this book is very much a challenge, an encouragement and a caution.
